## Language Enrichment Program

Together we open the doors to educational success for your preschool and kindergarten children.

Our state of the art educational software provides the building blocks for speech and language.

- InSpeech is a speech, language and educational service company comprised of Certified Speech Language Pathologists and other trained professionals. We are dedicated to providing quality services and products to your children.
- Using our combined expertise in the field of speech and language development, we are proud to introduce to you the InSpeech Language Enrichment Program. This exciting new language enrichment program targets the developmental steps that all children go through, from preschool to kindergarten.
- InSpeech educational software is delivered through a web-based program, providing an easy and cost effective model. It is designed with fun in mind.
- This educational software can be included in any curriculum, supporting not only language development but cognitive development, nonverbal skills, long and short term memory, problem solving and concept development.
- Tracking data is available in otherwise “hard to track” situations, assisting both the educator and the parent as to the child’s annual progress.
- English language learners gain maximal exposure to English language targets.
- Children who do not qualify for support services and are in need of additional educational support will be engaged at a comfort level that facilitates success.
- InSpeech has committed the support of Certified Speech Language Pathologists on call or via email to respond to questions from educators and parents.
- Our language enrichment educational software program is easy to use. It is accessible to parents for easy transitions and carryover of learning from the classroom to the home!

**Your child has a lot to tell you. How will you help them express it?**
